ANIISA BIHI

FRONTEND ENGINEER

SUMMARY

I am a developer intrigued by visual problem-solving and intuitive solutions that are scalable and sustainable. With my drive and keenness to learn, I have obtained broad skills for my interest in Frontend development, UX, and information visualization. I flourish by establishing structure, combining team morale with independent work, and putting time into details and visual attributes that elate the user experience. My career objective is to develop advanced and modern digital products focused on accessibility for everyone.
